

Please read instructions & precautions before using product.

**Warning:** Products are intended for use by adults of legal age and not by children or women who are pregnant or breastfeeding.

Under the Sun Groweries components may be choking hazards. Keep all components away from children and pets. If any components are ingested, immediately consult your doctor or vet or proceed to the emergency room.

Underage use prohibited. Not intended for use by persons under the age 18, 19 or 21 years depending on the province or territory.

## POWER SUPPLY

- I. Screw in the 510 thread end of the Power Supply into 510 thread USB charging adapter.
- II. Plug USB into active port or wall adapter.
- III. Halo lights up, indicating the device is charging. Halo remains lit during charging.
- IV. Halo flashes multiple times and may turn off when fully charged.
- V. Charging light stays red, even when fully charged. Once device is fully charged the light on the end of the battery will pulse 10 times and then turn off, indicating full charge. If device is plugged into an active USB port and the halo is not lit, the device is fully charged.

\*Instructions based on rechargeable CCELL battery. Please refer to individual user guide for specific requirements.

\*CCELL batteries are equipped with overcharge protection, allowing them to stay plugged in until used.

## HOW TO PLAY

- I. Insert/drop cartridge into device and secure the cartridge by screwing in the 510 thread tightly.
- II. Draw on mouthpiece (cartridge end) to activate. Device lights indicate the power supply is on and active.
- III. Cartridge or battery are empty when vapor is no longer produced when activated.
- IV. Device light typically flashes when the battery is depleted.
